PCTVS uses a layered prevention strategy to mitigate the spread of COVID-19.

PCTVS COVID-19 PROTOCOL GOALS

Protect the health, safety, and welfare of the school community.

Maintain the continuity of instruction and facilitate student learning to the greatest extent possible.

Provide a safe and supportive learning environment that supports social and emotional development, and provides access to critical services, in order to improve life outcomes.

Prioritize full time, in-person instruction for all students.

PCTVS COVID-19 MITIGATION STRATEGIES

When addressing COVID-19 cases on campus, PCTVS collaborates with the NJ Dept. of Health (DOH). All district decisions regarding COVID-19 mitigation on campus are informed by the latest guidance from the NJ Dept. of Education (NJ DOE), the NJ DOH, the US Center for Disease Control (CDC), and other relevant federal, state, and local governmental agencies. Formal guidance and data include, but are not necessarily limited to, NJ DOH Public Health Recommendations for K-12 Schools, levels of community transmission as identified by the NJ DOH COVID Activity Level Index (CALI Report); relevant NJ Executive Orders; CDC guidance recommended and/or incorporated by reference via the NJ DOH; etc. Mitigation strategies are developed considering attendant governmental guidance, as well as all relevant facts and circumstances, while balancing the need to protect the health and safety of the school community and the need for a return to full time, in-person instruction for all students.
